Our Services

Children & Their Families

The Arc supports families from the birth of a child with a disability, providing information and referrals for early intervention, administering grants to help cover the cost of services, family support, and assisting in transitioning youth from the school system into adulthood. This program also supports families with peer navigation, educational sessions for families, and community connections.

Workforce Development

Let our workforce strengthen yours. The Arc is committed to creating opportunities for people with intellectual and developmental disabilities to find meaningful jobs at sustainable wages that fit both the employee and employer's needs. Through pre-employment supports like CONNECT, employment discovery, and Project SEARCH, The Arc works in partnership with the person served to reach their employment outcome.

Living Options & Services

The Arc believes in safe, affordable and accessible housing with appropriate supports for all, and is committed to matching people with living options that are customized to the person, reflecting their personality and lifestyle.

Self-Directed Services

The arc offers people with intellectual disabilities and their families to directly hire his/her own staff to administer services. This program gives control and power to people with disabilities and their families to self-determine their own needs, while The Arc's team handles the fiscal management.
